

Your team. One shared workflow.

A practical guide to the AH Interiors CRM

From the first enquiry to the final customer follow-up.

Step-by-step module instructions, real screenshots, team handoffs and common blockers. Use alongside a supervised team pilot.

Scope: Describes the implemented local application as captured on 3 October 2026. It does not certify that the complete blueprint or production rollout is finished.

Screens show a Management account and existing local records, including demonstration data. Your role may show fewer controls. Example names, amounts and statuses are not training instructions.

START HERE

A clear operating routine

Keep one record, one owner and one next action.

1 Start the shift

Open Today, Tasks and Notifications. Check overdue cases, supplier commitments and today's delivery / fitting appointments. Review the source record before acting.

2 Furniture sales

Customer > Order > Invoice / payment check > Stock preparation > Purchase shortages > Goods receipt > Delivery > Assembly where needed > Completion.

3 Flooring sales

Lead > Measure > Quote > Acceptance evidence > Linked order / invoice > Materials > Fitting booking > Installation evidence / sign-off.

4 Customer issues

Linked service case > Owner and evidence > Contact commitments > Replacement / return / refund as agreed > Verified remedy > Customer agreement > Resolve / close.

5 Before handing over

Record what happened, attach evidence, identify the next owner and set a due date. A saved draft or approval is not proof that an external action happened.

6 End the shift

Update incomplete jobs and customer promises. Check unsent drafts, unreceived purchases and unrecorded payments with the responsible team member.

Who does what

Permissions vary by role and by the linked workflow.

Management

Staff access, shared rules, exceptions and full operational oversight.

Team Lead

Coordinate sales, stock and purchasing; review permitted approvals; escalate payment work to Accounts.

Customer Service & Sales

Customers, sales, flooring, delivery coordination and customer cases. Request financial or stock actions from authorised staff.

Warehouse

Receive and move physical stock. Supply accurate receiving references and raise discrepancies to the order / case owner.

Delivery

Work assigned delivery jobs and record actual progress and proof. Escalate failed deliveries promptly.

Installer

Work assigned assembly / fitting jobs and record completion evidence or issues.

Accounts

Issue / reconcile invoices, record verified payments and refunds, and manage expense records within permission.

Shopify Store Manager / Performance Marketing

Catalogue or reporting access according to role. These roles do not automatically grant full operational or integration access.

Today: start your shift

Use the dashboard to find work that needs attention.

Owner: All staff, within their access | Open: /

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open Today and check overdue follow-ups, exceptions and operational counts.
2. Open the underlying order or job before acting. Dashboard cards summarise records; they are not completion evidence.
3. Prioritise payment holds, supplier delays and today's customer commitments.
4. Use Search anything or the navigation to find a record. Check Tasks and Notifications for assigned follow-ups.

Handoff: Finish with a named owner and a next action on the underlying record.

Remember: Screenshots show the local workspace, including demonstration records. Recorded channel names do not prove a live connection.

Customers

Keep one shared customer record for orders, invoices and follow-ups.

Owner: Sales / customer service; Management and Team Lead | Open: /customers

+ New order

Ask Amiro
A little less busywork.

Settings

• AH Interiors · Staff workspace

Ask Amiro

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Search by the customer's details before adding a record to avoid duplicates.
2. Choose Add customer and enter the contact and address information requested by the form.
3. Open an existing customer to review linked orders, invoices and outstanding balances.
4. When creating a sale, select the existing customer. Confirm the delivery address for that particular order.

Handoff: Hand the customer record and order reference to the next team member.

Remember: An outstanding balance belongs to the invoice ledger. Do not change customer details to correct a payment discrepancy.

Products

Maintain the shared product details used by sales, purchasing and stock.

Owner: Catalogue-authorised staff | Open: /products

The screenshot shows the Amiro Product Master interface. On the left is a sidebar with the Amiro logo and navigation options under 'WORKSPACE' (Today, Orders, Customers, Products, Suppliers, Shopify) and 'OPERATIONS' (Review & approve, Purchasing, Inventory, Deliveries, Assembly jobs, Flooring, Customer service). Below the sidebar are buttons for '+ New order', 'Ask Amiro', and 'Settings'. The main area is titled 'Product Master' and includes a search bar, a '+ Add product' button, and four summary cards: 'Products in catalogue' (3), 'Active products' (3), 'Connected suppliers' (2), and 'Margin review' (0). Below these is a section for 'Your product catalogue' with a table of products.

Product	AH SKU	Status	Selling price	Contribution	Margin
Demo flooring (per sqm) Demo	DEMO-FLOORING	Active	£36.00	£18.00	60.0% Excellent
Demo sofa Demo	DEMO-SOFA	Active	£1500.00	£650.00	52.0% Excellent
Demo wardrobe Demo	DEMO-WARDROBE	Active	£2400.00	£960.00	48.0% Excellent

3 of 3 records

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Search the catalogue first, then use Add product or open the existing item.
2. Enter a unique AH SKU, product name, supplier and supplier SKU. Check variant details.
3. Select the correct stock / purchase unit. Each and Pack are whole units; measured units allow fractional quantities.
4. Enter supplier cost, selling price and VAT treatment accurately. Review the margin and product status before saving.
5. Use inactive or discontinued status for items no longer offered, retaining their history.

Handoff: Sales uses the catalogue item; purchasing uses its supplier mapping.

Remember: A catalogue entry does not create physical stock. Record receipts separately in Inventory.

Product entry: fields that matter

Check identifiers and units before the item enters a transaction.

Owner: Catalogue-authorised staff | Open: /products

The screenshot displays the Amiro AH Interiors Product Master interface. On the left is a sidebar with navigation options: Today, Orders, Customers, Products (selected), Suppliers, Shopify, Review & approve, Purchasing, Inventory, Deliveries, Assembly jobs, Flooring, and Customer service. Below these are buttons for '+ New order', 'Ask Amiro', and 'Settings'. The main content area is titled 'Product Master' and shows 'Products in catalogue' (3) and 'Active products' (3). It includes a search bar and a table of products: Demo flooring (per sqm), Demo sofa, and Demo wardrobe. On the right, a modal window titled 'Add product' is open, showing two sections: '01 Product identity' and '02 Website & marketplaces'. The 'Product identity' section contains fields for Stock/purchase unit (Each), Product name, AH SKU, Supplier (Select...), Supplier SKU, Category (Furniture), Product status (Active), Brand, Subcategory, Article, Barcode, and Notes. The 'Website & marketplaces' section contains fields for Website Url and Shopify Product Id. At the bottom right of the modal are 'Cancel' and 'Save product' buttons.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Confirm the AH SKU identifies the exact variant your team sells.
2. Map the correct supplier and supplier article reference so purchase requirements point to the right item.
3. Read the price labels carefully: supplier cost is excluding reclaimable VAT; Standard selling price is VAT inclusive.
4. Review any delivery, assembly or other cost inputs before relying on the contribution figure.
5. Save only after checking the unit. A pack, an individual item and a square metre are different quantities.

Handoff: Send a clear SKU and quantity to the salesperson or purchasing owner.

Remember: This screenshot is an unsaved form. No training product was added to the database.

Suppliers

Settings

AH Interiors - Staff workspace

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Search for an existing supplier before choosing Add supplier.
2. Enter the supplier name and account code, then complete the contact and trading fields.
3. Check standard lead time and whether collection is required.
4. Keep the supplier active only while available for new purchases. Update contacts when the relationship changes.

Handoff: Link the supplier to products and purchase orders.

Remember: A standard lead time is a planning value, not a confirmed ETA. Record the actual commitment against the purchase.

Orders: the central record

Ask Amiro

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Find the order using search, filters or its reference. Open it before creating another sale for the same request.
2. Check customer, products, quantities, channel, payment position and fulfilment groups.
3. Use Create order for a new sale. Use the existing record for subsequent purchasing, delivery and service work.
4. Follow the order's available next action. If blocked, correct the named requirement rather than marking a later stage manually.
5. Use the After-sales tab to find or start cases linked to this order.

Handoff: Accounts verifies payment; the operations owner prepares fulfilment.

Remember: Paid does not mean delivered. An approved preparation pack does not mean a supplier has received an order.

Create an order

Create the sale once, with the correct customer and product requirements.

Local workspace · no money collected

Ask Amiro

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Select the customer and sales channel; enter a source reference where applicable.
2. Select catalogue products and verify supplier, article / SKU, options and quantity.
3. Check unit prices and choose the proposed fulfilment route for each item.
4. Enter delivery / service charges and an internal note when needed. Review the order summary.
5. Create the order, then open the linked invoice and have Accounts reconcile payment before stock preparation.

Handoff: Give the order reference to Accounts and the fulfilment owner.

Remember: Resolve missing product mappings first. Do not create a second invoice for the same sale without checking the linked record.

Furniture fulfilment

Turn an eligible furniture order into stock requirements and real jobs.

Owner: Management / Team Lead, with Sales and Warehouse | Open: /orders

The screenshot shows the Amiro AH Interiors software interface. The sidebar on the left contains navigation links for 'Orders', 'Customers', 'Products', 'Suppliers', 'Shopify', 'Review & approve', 'Purchasing', 'Inventory', 'Deliveries', 'Assembly jobs', 'Flooring', and 'Customer service'. The main content area displays the 'Order details' for Sarah Jones, Order #10004822, dated 05 Sep 2026, from Cheshire. The order status is 'Paid'. A progress bar shows four stages: 01 - Payment (Recorded), 02 - Products (Link products), 03 - Delivery (0 / 1 shipments), and 04 - Completion (Delivery & sign-off pending). Below this, a 'Products & checks' section details a 'Luxury pocket mattress' with a price of £1,420.00. It includes a 'Shopify tag: supplier:hypnos' and a 'Specification checked: local record' which is 'Matched - sample'. A table shows the 'Supplier article' (SAMPLE-4822), 'Catalogue reference' (Hypnos sample catalogue - p. 24), and 'Supplier unit cost (£)' (710.00). The 'Customer order total' is £1,420.00. On the right, a 'Connected Fulfilment' sidebar offers a 'Manage stock & shipments' section with a 'See stock shortages, purchase orders, delivery jobs and assembly sign-off in one workflow.' and an 'Open fulfilment' button. Below this is the 'Customer & destination' section for Sarah Jones, with delivery address '24 Example Street, Cheshire M2 1AA · United Kingdom' and email 'sarah.jones@example.co.uk'.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open the order and its fulfilment controls. Check payment eligibility, products and routes.
2. Prepare stock: the workflow allocates available physical stock and creates supplier purchase drafts for shortages.
3. Review shortage purchases in Purchasing. Receive actual goods in Inventory, then return and prepare again.
4. If part of a shipment needs a different schedule, split whole-item quantities before delivery or assembly jobs exist.
5. When a group is ready, create its delivery and applicable assembly jobs. Complete those jobs in their own modules.

Handoff: Warehouse records receipts; the delivery coordinator books the generated job.

Remember: Existing jobs and allocations restrict later edits. Do not use legacy manual receipt flags as proof of available stock.

Invoices and customer payments

Ask Amiro: A little less busywork.

Settings

• AH Interiors - Staff workspace

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open the order's linked invoice, or find it in Invoices. Check the customer and sale before adding another document.
2. Review draft lines, dates, VAT and totals, then issue using the available invoice action.
3. Accounts records a verified payment with the correct amount, method and reference.
4. Check payment history and remaining balance. Investigate a discrepancy against the original payment evidence.
5. For a refund, follow the approval requirement and record the actual refund in the invoice workflow.

Handoff: Operations uses the recorded payment position; service cases link recorded refunds.

Remember: Payment and refund entries are ledger records. They do not move money through a bank or payment provider. Accounts is an alias of this invoice workspace.

Purchasing

Settings

AH Interiors - Staff workspace

Ask Amiro

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open the purchase draft generated from fulfilment, or create a purchase when appropriate.
2. Check supplier, product, quantity, agreed cost and related sale before progressing the purchase.
3. Use the purchase document for supplier review. Send through your agreed external supplier channel.
4. Record the status that matches reality, plus confirmation and expected arrival details in supplier tracking.
5. When goods arrive, record Goods Received against the confirmed purchase in Inventory.

Handoff: Supplier tracking owns the chase; Warehouse records the physical receipt.

Remember: Changing a status is not an email or supplier portal submission. Case replacement purchases must retain their case-controlled item and quantity.

Supplier tracking

Monitor supplier confirmation, ETA and follow-up commitments.

Owner: Purchasing / operations owner | Open: /supplier-tracking

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open Supplier tracking and check Confirmation Overdue, ETA Overdue and chase filters.
2. Open the relevant purchase and verify the supplier reference.
3. After contacting the supplier, update confirmation, expected arrival and follow-up information.
4. If the ETA changes, tell the owner of the affected customer order and review any planned delivery.
5. Keep the record current until goods are received or the purchase is properly cancelled.

Handoff: Pass confirmed arrival information to Warehouse and the delivery coordinator.

Remember: A supplier promise does not increase stock. Physical receipt must be recorded separately.

Inventory and stock

Record physical movements and see what remains available after reservations.

Owner: Warehouse; Management / Team Lead | Open: /inventory

The screenshot shows the Amiro AH Interiors Inventory & stock management interface. The sidebar on the left contains navigation options under 'WORKSPACE' (Today, Orders, Customers, Products, Suppliers, Shopify) and 'OPERATIONS' (Review & approve, Purchasing, Inventory, Deliveries, Assembly jobs, Flooring, Customer service). The main content area is titled 'Inventory & stock' and includes a summary of key metrics: Stocked Products (0), Physical Locations (3), Active Reservations (0), and Incoming Purchases (0). Below the summary is a table for 'Stock by product and location' and a 'Movement history' table. At the bottom, there is a form to 'Add stock location' with fields for Location name, Physical, and an Add location button.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Check the product and physical location in Stock by product and location.
2. Use the movement form and select the correct movement type, product, quantity and location.
3. For Goods Received, select the confirmed purchase order and record only the quantity actually received.
4. Use the appropriate transfer, damage or authorised adjustment workflow, with a clear reason.
5. Review movement history after saving. For linked customer jobs, let the delivery or fitting workflow consume the allocated stock.

Handoff: Notify the fulfilment owner that goods are received so they can prepare remaining requirements.

Remember: Reserved stock is already committed. Do not bypass linked delivery proof by recording a separate Customer Delivery movement.

Deliveries

Book and complete real delivery jobs linked to order groups.

Owner: Operations coordinator; assigned Delivery staff | Open: /deliveries

1 of 1 records

From warehouse to doorstep
Open a record to manage its next step.

1 Awaiting Stock > 2 Ready to Book > 3 Booked > 4 Out for Delivery > 5 Delivered

[Ask Amiro](#)

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Find the job in List, Board or Schedule. Check readiness, address, postcode and customer contact.
2. Enter the delivery date, time slot, team / assignee and transport details.
3. Confirm the appointment with the customer and record confirmation before progressing.
4. At dispatch, move the job through the permitted stage. Linked stock is consumed through the job workflow.
5. At delivery, record proof / signature reference. If unsuccessful, record the failed reason and arrange the next action.

Handoff: Pass delivered items to the assembly team where applicable; report problems to Customer service.

Remember: Ready to Book, Booked and Delivered are different facts. A date alone is not delivery evidence.

Assembly jobs

Plan installation of furniture and collect completion evidence.

Owner: Operations coordinator; assigned Installer staff | Open: /assembly-jobs

The screenshot shows the Amiro AH Interiors 'Assembly jobs' workspace. The sidebar on the left contains navigation links for various workspace and operations functions. The main area features a summary of assembly job records categorized by status: Active records (0), Due today (0), Needs attention (0), and Completed (0). Below this is the 'Assembly schedule' section, which includes a search bar and a table with columns for Record / customer, Status, Assigned to, Scheduled date, and Reference. A large central graphic with a hammer icon and the text 'Make room for a great finish.' is prominently displayed, along with a 'Create assembly job' button and a 'View sales orders' link.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Use Assembly jobs for operational work. Open the job linked to the correct order group.
2. Check the address, delivery dependency, assembly scope and customer requirements.
3. Assign the installer and set the date / time. Confirm the appointment before starting.
4. Mark work In Progress when it starts. On completion, record the required customer sign-off.
5. If there is a problem, record it and use Issue Reported / the permitted next step. Create a linked service case when needed.

Handoff: The coordinator checks completion and owns any follow-up issue.

Remember: The separate Fulfilment screen at /assembly is a legacy preview. Use /assembly-jobs for real assembly records.

Flooring: enquiry to quote

Manage measurement, quote preparation and the customer decision.

Owner: Sales / customer service; Management and Team Lead | Open: /flooring

The screenshot displays the Amiro Flooring CRM interface. On the left is a sidebar with navigation options: Today, Orders, Customers, Products, Suppliers, Shopify, Review & approve (1), Purchasing, Inventory, Deliveries, Assembly jobs, Flooring (selected), and Customer service. Below these are buttons for '+ New order', 'Ask Amiro' (A little less busywork), and 'Settings'. The main workspace is titled 'Flooring CRM' and includes a search bar, a 'Materials & fitting' button, and a '+ Create flooring lead' button. A summary section shows four cards: 'Active records' (0), 'Due today' (0), 'Needs attention' (0), and 'Completed' (0). Below this is a 'Lead pipeline' section with a table of leads. The table has columns for Lead / customer, Status, Assigned to, Next follow-up, and Quote margin. One lead is shown: Amir Khan (Sarah Jones), Status: Lost, Assigned to: Demo Manager, Next follow-up: 10 Oct, Quote margin: 100.0%. At the bottom, a 'Clear path from start to finish' section shows a 5-step process: 1. Lead, 2. Measure Booked, 3. Quote, 4. Won, 5. Completed.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Create a flooring lead linked to the customer. Record product type, budget, branch and the next follow-up.
2. Book the measure with date, time and surveyor. Record measured rooms and site notes after the visit.
3. Build the quote with mapped material products, quantities and costs. Check margin and the customer-facing totals.
4. Record follow-up outcomes. If accepted, use the acceptance action and enter acceptance evidence.
5. Acceptance creates the connected order / invoice and material snapshot. Continue in Materials & fitting.

Handoff: Accounts verifies the invoice; the fulfilment owner prepares materials.

Remember: Accepted materials and quote details are protected. Irregular roll-cut optimisation and post-acceptance revision are not complete workflows.

Flooring: materials and fitting

Allocate accepted materials and carry the job through fitting.

Owner: Operations / Management; assigned fitter | Open: /flooring/fitting

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open the accepted flooring project in Materials & fitting. Check its material requirements and payment readiness.
2. Prepare materials. Review shortage purchase drafts and receive incoming stock through Inventory.
3. Assign a fitter, fitting date, time window and site instructions. Record customer confirmation.
4. Start fitting through the project controls when ready; allocated materials are handled by the workflow.
5. Complete with required photographic evidence and customer sign-off, or report an issue for follow-up.

Handoff: The job owner checks evidence and makes sure any service case has an owner.

Remember: Partial fitting and measured flooring returns are not fully supported. Escalate these cases before promising a workflow.

Customer service: open and own a case

Give every issue an owner, evidence and a next commitment.

Owner: Sales / customer service; Management and Team Lead | Open: /service-cases

The screenshot displays the Amiro Customer service interface. On the left is a sidebar with navigation options: Today, Orders, Customers, Products, Suppliers, Shopify, Review & approve, Purchasing, Inventory, Deliveries, Assembly jobs, Flooring, and Customer service (selected). Below the sidebar are buttons for '+ New order', 'Ask Amiro', and 'Settings'. The main content area is titled 'Customer service' and includes a 'Create customer service case' button. It features four summary cards: Active cases (1), Due today (0), Needs attention (0), and Completed (0). Below these is a 'Case workspace' section with a table of cases. The table has columns for Record / customer, Status, Assigned to, Next chase, and Reference. A single case is listed: Case #10004812 - Lucy Turner, Status: New, Assigned to: Demo Manager, Next chase: Unscheduled, Reference: CS-8B594430. At the bottom, a process flow diagram shows steps from New to Resolved.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open the order's After-sales tab or Customer service. Check for an existing case before creating another.
2. Select the customer and correct order where relevant. Set case type, priority, reported date and a useful description.
3. Assign an owner and attach photographs / documents. Record the affected product before arranging a replacement or return.
4. Use Contact to log actual customer or supplier communication and set their separate next-update dates.
5. Use Customer update due, Supplier chase due and Replacement overdue filters to run the daily case queue.

Handoff: The case owner coordinates purchasing, Warehouse and Accounts until the remedy is complete.

Remember: One case supports one product requirement and one replacement / refund chain. Use separate cases for separate items or new replacement cycles.

After-sales: replacement, return and refund

Use the connected remedy controls inside the case drawer.

Owner: Case owner, with Management / Warehouse / Accounts | Open: /service-cases

The screenshot displays the Amiro Customer Service interface. On the left is a sidebar with navigation options: Today, Orders, Customers, Products, Suppliers, Shopify, Review & approve, Purchasing, Inventory, Deliveries, Assembly jobs, Flooring, and Customer service (selected). Below the sidebar are buttons for '+ New order', 'Ask Amiro', and 'Settings'. The main workspace is titled 'Customer service' and includes a summary of active cases (1) and due today (0). It also features a 'Case workspace' section with tabs for 'All cases', 'My work', 'Overdue', 'Awaiting Supplier', and 'Repl'. A table lists the case 'Case #10004812 - Lucy Turner' with a 'New' button. The right panel shows the detailed view for this case, including customer information, assigned manager, and a 'Make the customer whole' section with options for replacement, return, refund, or resolve. It also includes a 'Log update' button and a 'Next promised update / chase' field.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Replacement: configure the original-order product and whole quantity. An authorised stock owner prepares allocation and a shortage purchase if needed.
2. Receive purchased goods through Inventory, prepare again, then create the replacement delivery. Complete it with delivery proof.
3. Return: choose the delivered reservation, quantity, receiving location and Restock or Write off. Record the inspection reason.
4. Refund: request the amount and reason; obtain the required independent approval. Accounts records the actual invoice refund, then links it to the case.
5. Resolve: select the outcome, explain it and confirm customer agreement. The workflow checks evidence. Reopen with a reason if further work is needed.

Handoff: Close only after the chosen remedy and customer agreement are recorded.

Remember: Approval alone is not a refund. Stopping a replacement requires permitted stock / purchase conditions and does not cancel arrangements with the supplier externally.

Tasks and follow-ups

Make a commitment visible to its owner and the rest of the team.

Owner: Staff with task access; permissions vary by role | Open: /tasks

The screenshot shows the Amiro 'Tasks & follow-ups' interface. The left sidebar contains the 'AH Interiors' workspace with various operational categories. The main area displays a 'Tasks & follow-ups' section with a summary of active records, due today, needs attention, and completed tasks. Below this is a table of tasks, including one for 'Sort out this please' which is completed. The interface includes a search bar, filters, and a 'Create task' button.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Choose Create task. Use an action-led title, a useful description and a priority.
2. Assign the person responsible, set the due date and add a reminder time if needed.
3. Link the relevant record type and exact record ID so the task has context.
4. Use My work, Due today and Overdue to plan the shift. Move work to In Progress when started.
5. Complete only after doing the action; record the result on the linked business record as well.

Handoff: If another person must act next, assign a clear follow-up with a due date.

Remember: Completing a task does not complete the linked delivery, purchase, case or invoice. Update that record separately.

Management approvals

Record an exception decision against a specific business transaction.

Owner: Requesting staff; authorised approver for decisions | Open: /approvals

Decisions, with a clear record. Request a margin exception, refund or other management decision. Keep the reason, amount and linked record together. + Create approval request				

[Ask Amiro](#)

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Create an approval request or use the linked workflow, such as a case refund request.
2. Choose the correct type and related record. Enter the reason and exact requested amount where applicable.
3. An authorised approver reviews the record, supporting evidence and decision notes.
4. Record Approved or Rejected through the permitted transition. Refund requests require an independent approver.
5. After approval, return to the original workflow and perform the authorised action.

Handoff: Accounts or the operational owner completes the approved transaction.

Remember: An approval is permission, not execution. The request must match the intended record, amount and approval type.

Expenses

Capture costs and keep their review and payment status clear.

Owner: Accounts, Management and Team Lead | Open: /expenses

Workspace > Expenses

Ask Amiro
A little less busywork.

Settings

AH Interiors - Staff workspace

Ask Amiro

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Choose Create expense and enter the date, category, payee and description.
2. Enter net amount and VAT separately, plus branch / department and payment details as needed.
3. Attach the receipt or supplier document to the expense record.
4. Submit for review and follow the required approval route. Read any rejection notes before resubmitting.
5. Record Paid only after payment has actually happened and keep the payment evidence.

Handoff: Accounts reconciles the expense and management reviews business costs.

Remember: The Paid stage records a fact; it does not transfer money. Full supplier credit-note accounting is not implemented.

Communications

Prepare reusable drafts linked to customer and operational records.

Owner: Staff with access to the relevant record | Open: /communications

Workspace > Communications

+ New order

Ask Amiro
A little less busywork.

Settings

• AH Interiors - Staff workspace

Ask Amiro

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open Communications and find an existing draft before creating another.
2. Select the linked record, then check recipient, subject and message body.
3. Review names, amounts, dates and any promises against the source record.
4. Save the draft. Send through the team's actual email or messaging channel.
5. After sending, log the communication and the next commitment on the order, case or task.

Handoff: The responsible staff member owns sending and logging the outcome.

Remember: Saving a draft does not send an email. No live email delivery is implied by this screen.

Documents and evidence

Store supporting files with the transaction they explain.

Owner: Staff with access to the linked record | Open: /documents

+ New order

Ask Amiro
A little less busywork.

Settings

• AH Interiors · Staff workspace

Ask Amiro

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Search Documents or open Supporting documents inside the relevant record.
2. Choose the correct linked customer, order, invoice or job before uploading.
3. Add a PDF or photo using a descriptive filename, for example the order number and evidence type.
4. Open the uploaded file to confirm it is legible and belongs to the right record.
5. Use a team note to explain what the evidence confirms and any action it requires.

Handoff: The next owner can open the source record and review the evidence.

Remember: Record attachment controls show a 10 MB limit per file. Downloads require staff access. An uploaded file does not automatically update a job status.

Reports

Review recorded sales, operational performance and cost completeness.

Owner: Management, Team Lead, Accounts; reporting roles | Open: /reports

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open Reports and choose the relevant report section.
2. Read the metric labels carefully: recorded order value, issued invoices and collected cash are different measures.
3. Check sales by channel / product / supplier and review operational status summaries.
4. For profitability, check how many product and variable costs have been verified before trusting the result.
5. Investigate discrepancies using the original order, invoice or operational record.

Handoff: Assign corrections to the owner of the source data, then review the report again.

Remember: Unverified costs make profit incomplete. Reports are not a substitute for a complete accounting ledger or stock valuation system.

Notifications

Use reminders to find overdue work and open the right record.

Owner: Signed-in staff | Open: /notifications

The screenshot displays the Amiro AH Interiors Notifications page. The sidebar on the left contains a 'WORKSPACE' section with links to Today, Orders, Customers, Products, Suppliers, and Shopify, and an 'OPERATIONS' section with links to Review & approve (1), Purchasing, Inventory, Deliveries, Assembly jobs, Flooring, and Customer service. Below the sidebar is a '+ New order' button and an 'Ask Amiro' section with the text 'A little less busywork.' and a 'Settings' button. The main content area is titled 'Notifications' and includes a sub-header 'Follow up on the work that needs your attention.' It features two tabs: 'Unread (14)' and 'All notifications'. The notifications list includes:

- New customer service case assigned**: Case - #10004812 - Lucy Turner, 03/10/2026, 16:34:46. Buttons: Open record, Mark read.
- flooring lead updated**: Amir Khan - Lost, 03/10/2026, 15:01:37. Buttons: Open record, Mark read.
- New flooring lead assigned**: Amir Khan, 03/10/2026, 13:56:46. Buttons: Open record, Mark read.
- task updated**: Sort out this please - Completed, 03/10/2026, 04:57:21. Buttons: Open record, Mark read.

The top navigation bar shows 'Workspace > Notifications', a search bar, and user information for 'Demo Manager Management'.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open the bell or Notifications screen at the start of the shift.
2. Read the reminder and open its linked record before deciding what to do.
3. Complete the action, update the evidence and set the next follow-up date if the work remains open.
4. Mark a notification read when reviewed, then continue checking the underlying due-work filters.

Handoff: Each reminder should result in a record update or a named next action.

Remember: Reading a notification does not complete work. Reminder generation depends on the background jobs runner; production scheduling still needs configuration.

Staff and business settings

Manage staff access and shared operating rules.

Owner: Management | Open: /settings/business

The screenshot displays the 'Staff & business settings' page in the Amiro AH Interiors system. The sidebar on the left contains navigation links for various workspace and operations functions. The main content area is divided into two primary sections: 'Staff access' and 'Business rules'.

Staff access section: This section shows a table of active staff members. The table has columns for Name, Email, Role, Status, and Action. Three staff members are listed: Demo Sales, Demo Warehouse, and Demo Manager. Each has a 'Disable' button next to their status.

Name	Email	Role	Status	Action
Demo Sales	sales@ahinteriors.test	Customer Service & Sales	Active	<button>Disable</button>
Demo Warehouse	warehouse@ahinteriors.test	Warehouse	Active	<button>Disable</button>
Demo Manager	manager@ahinteriors.test	Management	Active	<button>Disable</button>

Below the table is an 'Add staff member' form with fields for Name, Email, Department, a dropdown for Role (currently set to Management), and an Initial password field. An 'Add staff' button is at the end of the form.

Business rules section: This section contains several configuration fields:

- Business time zone:** A dropdown menu currently set to 'Europe/London'.
- VAT rate (basis points):** A text input field containing '2000'.
- Confirmation warning (days):** A text input field containing '3'.
- Service chase (days):** A text input field containing '3'.
- Flooring follow-up (days):** A text input field containing '7'.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Add staff using their own name, email and appropriate role. Avoid sharing one manager account across the team.
2. Disable access when a staff member leaves or no longer needs the system.
3. Confirm the business time zone so today and overdue calculations match your operation.
4. Review VAT, approval thresholds, reminder periods, margin bands and business lists before saving.
5. Check the field units: basis points and pence are not percentages and pounds. For example, 2000 basis points = 20%; 10000 pence = GBP 100.

Handoff: Tell the team about rule changes and verify each person can access their assigned work.

Remember: Hosting, automated backups and recovery setup are deployment tasks; they are not completed by saving these settings.

Appearance and general settings

Adjust the workspace appearance and locate account / business controls.

Owner: Individual staff; administrator for shared setup | Open: /settings

The screenshot displays the 'Settings' page for 'AH Interiors'. The left sidebar contains navigation links for 'Today', 'Orders', 'Customers', 'Products', 'Suppliers', 'Shopify', 'Review & approve', 'Purchasing', 'Inventory', 'Deliveries', 'Assembly jobs', 'Flooring', and 'Customer service'. The main content area is titled 'Workspace settings' and includes a 'Local configuration' button. The 'Appearance' section is expanded, showing three categories: 'Motion' (with 'Full motion' selected), 'Materials' (with 'Frosted glass' selected), and 'Navigation' (with 'Responsive' selected). To the right, the 'You stay in control' section indicates '8/8 Approval policies defined'. Below this, the 'Supplier defaults' section shows a table with settings for 'Rauch'.

Supplier defaults	
Rauch · sample configuration	
Ordering method	Price tolerance
Email	± £10
Assembly timing	Preferred installer
After delivery confirmed	Flatpack
New order auto-start	Confirm
Never	Verified

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Use the appearance controls to choose the available layout, navigation and motion preferences.
2. Use Staff & business settings for real user accounts and shared rules.
3. Read integration labels carefully. A preview card or toggle is not proof of an authenticated connection.
4. For the actual Shopify setup, use the dedicated Shopify screen after publication.

Handoff: Escalate access changes to Management.

Remember: Some integration cards in general settings remain preview controls. Do not tell customers that a service is connected based on a toggle.

Shopify: after publication

Review imported store orders in the same CRM workflow.

Owner: Management / authorised integration owner | Open: </integrations/shopify>

Workspace > Shopify

Search anything

AM Demo Manager Management

Shopify

Bring store orders into the same customer, product and fulfilment workflows your team uses.

[Connect store](#) [Sync orders](#)

ah-interior-nelson-ltd.myshopify.com
Add your store's Admin API token to connect. [Not connected](#)

Awaiting review Imported orders Changed in Shopify

0 0 0

Search order or customer Needs review

Shopify order	Customer	Total	Payment in Shopify	Import status	Action
Connect your store to begin Orders appear here after a successful sync. The first sync reads up to 59 days of accessible orders in pages.					

Imports create an order and draft invoice. Accounts must reconcile payments and VAT before fulfilment. Shopify changes to already imported orders are flagged for review. This connection currently reads orders; stock, refunds and fulfilment are not pushed to Shopify.

[Ask Amiro](#)

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. After publishing, the integration owner connects [ah-interior-nelson-ltd.myshopify.com](#) securely through Connect store.
2. Use Sync orders to stage accessible store orders for review.
3. Review the customer, address, SKU / product mappings, quantities, totals and payment information.
4. Import the reviewed order once. Open the resulting CRM order and draft invoice.
5. Accounts reconciles payments and VAT before fulfilment. Review later Shopify changes flagged against imported orders.

Handoff: The imported order follows the same purchasing, stock and delivery process as other sales.

Remember: Not connected at capture time. This integration reads orders; it does not push stock, refunds or fulfilment back to Shopify. Never put access tokens in team messages.

Review & approve: preparation packs

Review prepared information without confusing it with supplier execution.

Owner: Sales and operational reviewers | Open: /reviews

The screenshot shows the Amiro AH Interiors 'Review & approve' interface. The sidebar on the left contains navigation options under 'WORKSPACE' (Today, Orders, Customers, Products, Suppliers, Shopify) and 'OPERATIONS' (Review & approve, Purchasing, Inventory, Deliveries, Assembly jobs, Flooring, Customer service). The main area displays 'YOUR APPROVAL DESK' with a 'Review & approve' section. It includes a 'Review queue' with 1 item, 'Approved locally' with 0 items, and 'Not yet processed' with 3 items. A specific review item for 'John Smith #10004821' is shown, with a value of £2,840.00 and a 'Review pack' button. A 'Back to Today' button is also present.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open a pending preparation pack from Review & approve or its order.
2. Check product specification, supplier grouping, proposed messages and blockers.
3. Correct source information before approving the prepared pack.
4. Continue operational work in Purchasing, Inventory and the real delivery / assembly modules.

Handoff: The purchasing owner still places the supplier order through the agreed supplier channel.

Remember: This screen still includes local-preview wording. Pack approval does not send messages, place supplier purchases or book real transport.

Amiro assistant

Use summaries and drafting prompts as preparation aids.

Owner: Staff using the preview assistant | Open: /assistant

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. Open the assistant with the relevant order selected where possible.
2. Ask for a summary, blocking issue or supplier follow-up draft.
3. Check the response against the current source record, especially quantities, dates and payment status.
4. Perform the real action through the corresponding CRM module and log the outcome.

Handoff: A staff member remains responsible for reviewing and executing the next step.

Remember: The assistant page is labelled Local preview. It is not an autonomous operator or evidence that an external message was sent.

Legacy Fulfilment screen

Recognise the older preview so it is not used as the operational schedule.

Owner: Reference only | Open: /assembly

The screenshot displays the 'Fulfilment' screen in the Amiro AH Interiors system. The sidebar on the left contains navigation options under 'WORKSPACE' (Today, Orders, Customers, Products, Suppliers, Shopify) and 'OPERATIONS' (Review & approve, Purchasing, Inventory, Deliveries, Assembly jobs, Flooring, Customer service). The main content area is titled 'Fulfilment' and includes a subtitle 'Coordinate the final step. The right team, on the right day, after delivery.' It features four summary cards: 'Assembly jobs' (05), 'Scheduled' (02), 'Awaiting scheduling' (02), and 'Date exceptions' (01). Below these is a calendar for September 2026 showing a booking for James Reed on Tuesday, 8th. At the bottom, there's a section for 'Assembly jobs' with a search bar and an export button.

CURRENT LOCAL WORKSPACE | Full-resolution screenshot - zoom for field labels

1. The navigation item Fulfilment opens the older /assembly screen.
2. Treat its sample rows and draft interactions as preview content.
3. For furniture assembly, use Assembly jobs at /assembly-jobs.
4. For flooring, use Flooring > Materials & fitting. For deliveries, use Deliveries.

Handoff: Use the real job record as the single source of operational progress.

Remember: Do not schedule the team or promise a customer appointment from this legacy preview.

When something blocks the workflow

Resolve the underlying requirement, then retry the intended action.

Permission denied or a missing button

Ask Management to check your staff role and assignment. Do not use another person's account.

Record changed since you opened it

Reload the record, review the other staff member's update and reapply only the change still needed.

Stock not ready

Check product mapping, physical receipt, location and allocation. An incoming purchase or supplier ETA is not stock on hand.

Delivery / fitting will not progress

Read the missing requirement: payment, allocation, date, assignment, confirmation or evidence. Complete it in the correct source record.

Refund cannot resolve a case

Approval alone is insufficient. Accounts must record the actual refund against the correct invoice and link it to the case.

Reminder or integration has not run

Check whether the background runner or connection has actually been configured. Shopify is intentionally deferred until publication.

The real-world situation is outside the workflow

Escalate partial fitting, replacement assembly, bespoke spare parts, complex measured returns or supplier credit notes. Agree a controlled process before recording completion.

Before full-team use: Publish securely, configure real staff access and scheduled jobs, verify backups / recovery, and run representative real orders through a supervised pilot.
